

# Adding & Subtracting Fractions Honeycomb Game

Copy pages onto color cardstock and/or laminate.

Cut addition and subtraction cards.

Shuffle cards and place in a pile, face down.

Give each player game chips of a different color.

Children take the top card off the pile, calculate the answer, and place their color chip over a hexagon with that answer.

Answers may be found on more than one hexagon.

Winner is first to cover 4 hexagons in a row, in any direction.

If all cards are used without a winner, re-shuffle and continue.

$$\frac{3}{4} - \frac{1}{4}$$

$$\frac{4}{5} - \frac{1}{5}$$

$$\frac{3}{5} - \frac{2}{5}$$

$$\frac{2}{3} - \frac{1}{3}$$

$$\frac{3}{6} - \frac{2}{6}$$

$$\frac{4}{6} - \frac{2}{6}$$

$$\frac{5}{6} - \frac{3}{6}$$

$$\frac{6}{7} - \frac{5}{7}$$

$$\frac{5}{7} - \frac{4}{7}$$

$$\frac{4}{7} - \frac{2}{7}$$

$$\frac{7}{8} - \frac{3}{8}$$
