

Around the Block

Division

Materials: die, one game piece per player, 15 game chips per player in 2 colors

Objective: To get all game chips onto the board.

Directions:

Begin on Start.

Roll die and move that number of spaces.

Solve the division sentence you landed on.

Place chip on the quotient in the center.

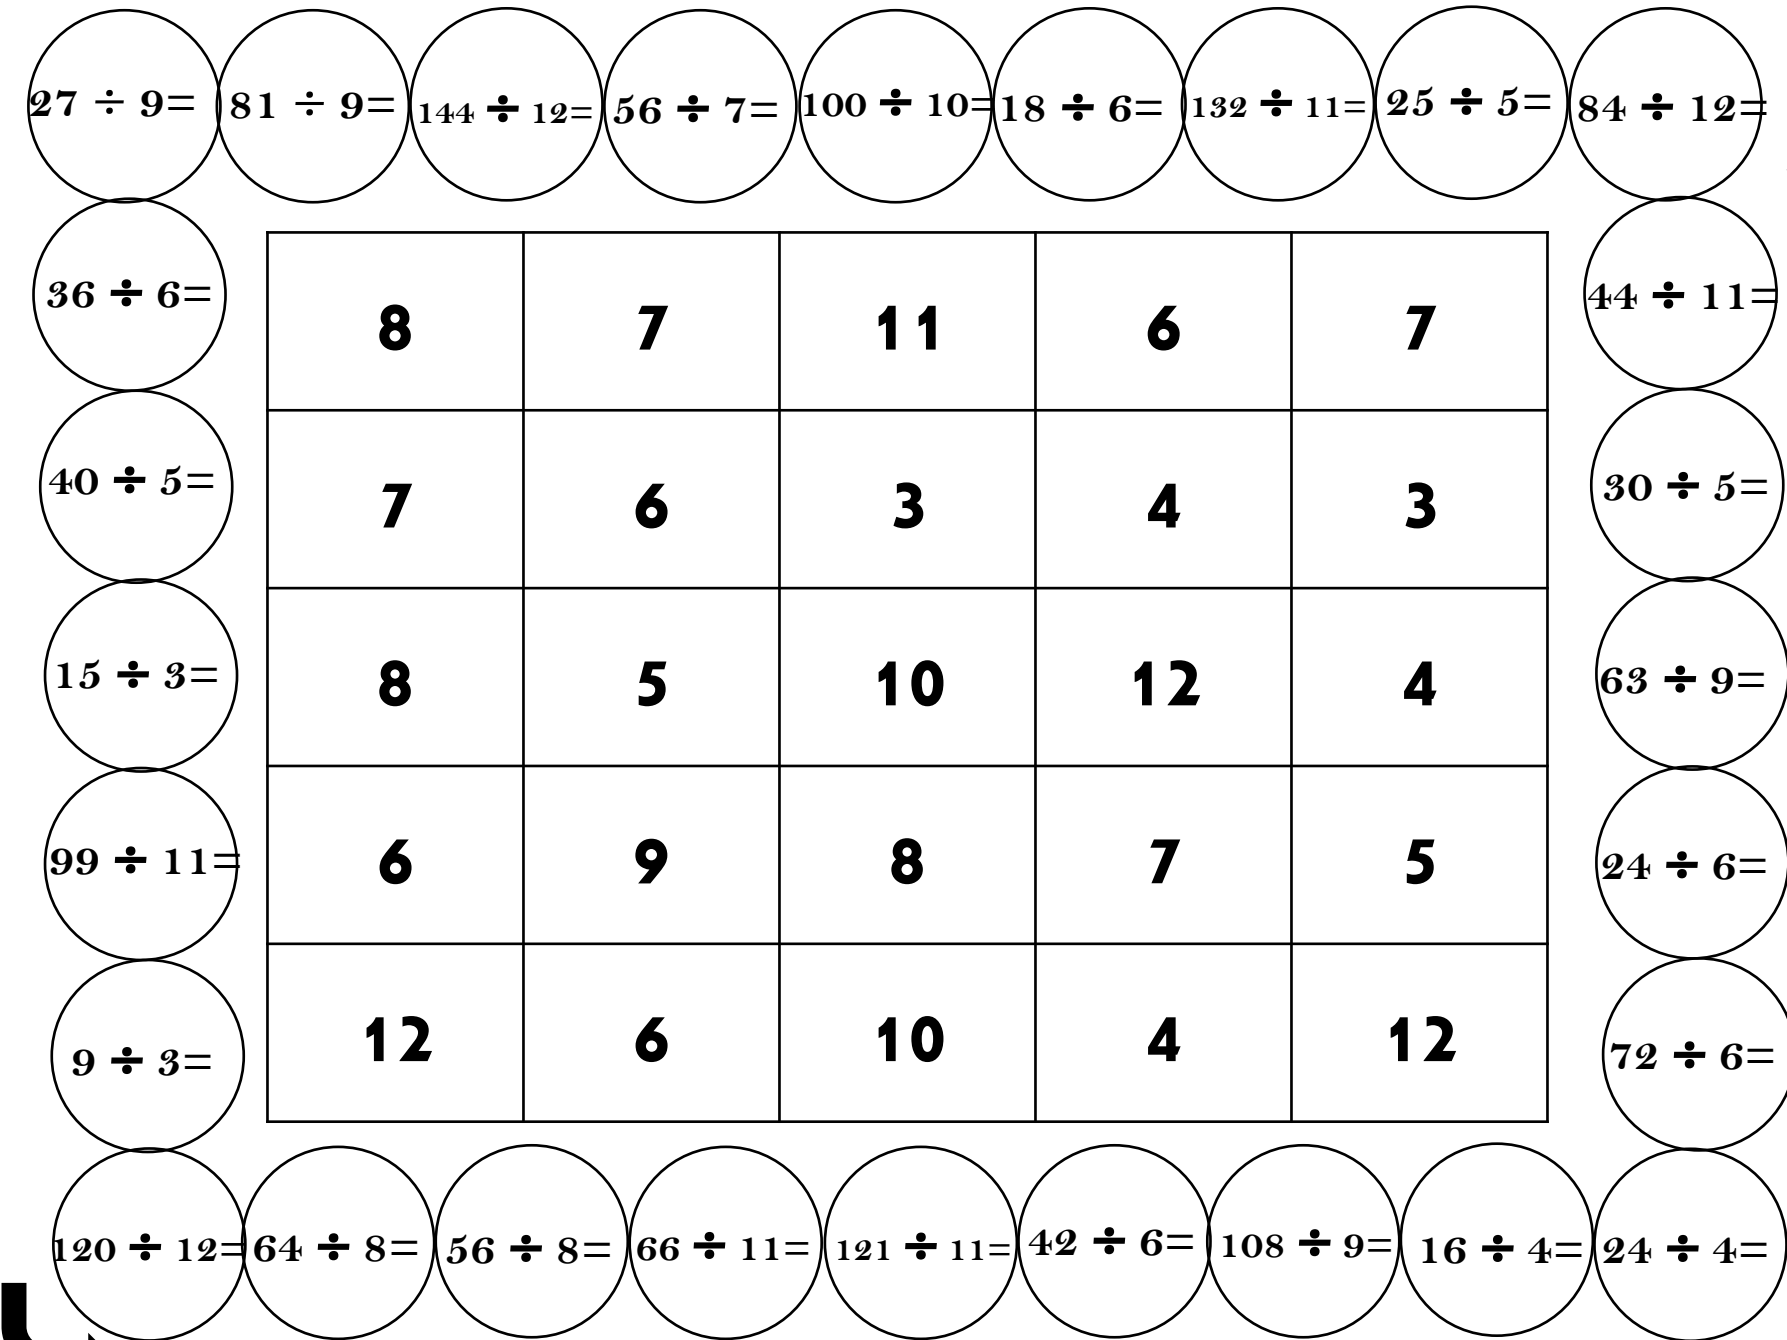

If you land on a space that has your opponent's chip on it, remove their chip and replace with your own.

If you land on a space that has your own chip on it, place a second chip on top. It is now locked in and can't be replaced with your opponent's chip.

Continue going around the board until one player has used all chips.

Winner is the first to get all game chips on the board.
