Color a star for each time the page is read.

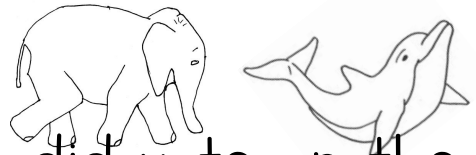

The Class Graph

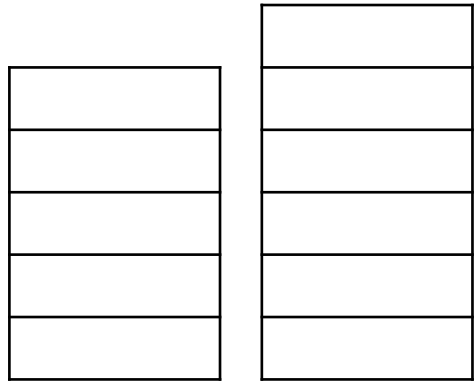

In math class we made a graph of which animals we like the best.

The elephant got the most votes with six. The dolphin got five.

We did vote on the best subject. I liked phonics best because we sing the alphabet. My pal likes math because we have fun with shapes, like spheres and squares.

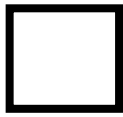

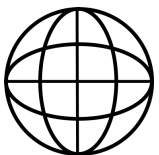

Miss Jones said we will not do more of this

phase of the math project.

She will take a photo on the phone to share with the
