

Happy Earth Day

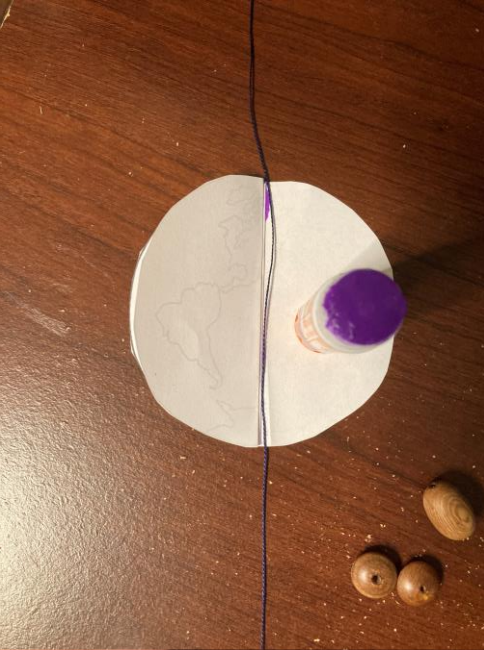

2024

Earth Day Spinner

Color and cut out all four circles.

Glue circles back to back, alternating between eastern and western hemispheres. Make sure all North Poles are facing up.

Before adding last circle, tape string into center.

After gluing last piece, string wooden beads or a metal washer to the bottom. After looping over the bottom bead, you can make the string go back up through the top beads again. Double knot.

Tie a loop at the top and cut off the remaining string. Hang in the wind for best effects.
