

Create an Animal Hotel

Provide students with makerspace supplies:

- Cardboard boxes
- Masking tape
- Scissors
- Rulers
- Liquid glue
- Glue sticks
- Toilet paper rolls
- Paper towel rolls
- Pipe cleaner
- Paint
- String
- Q-tips
- Paper cups

Give students a set amount of time (1-2 hours is a good amount) to:

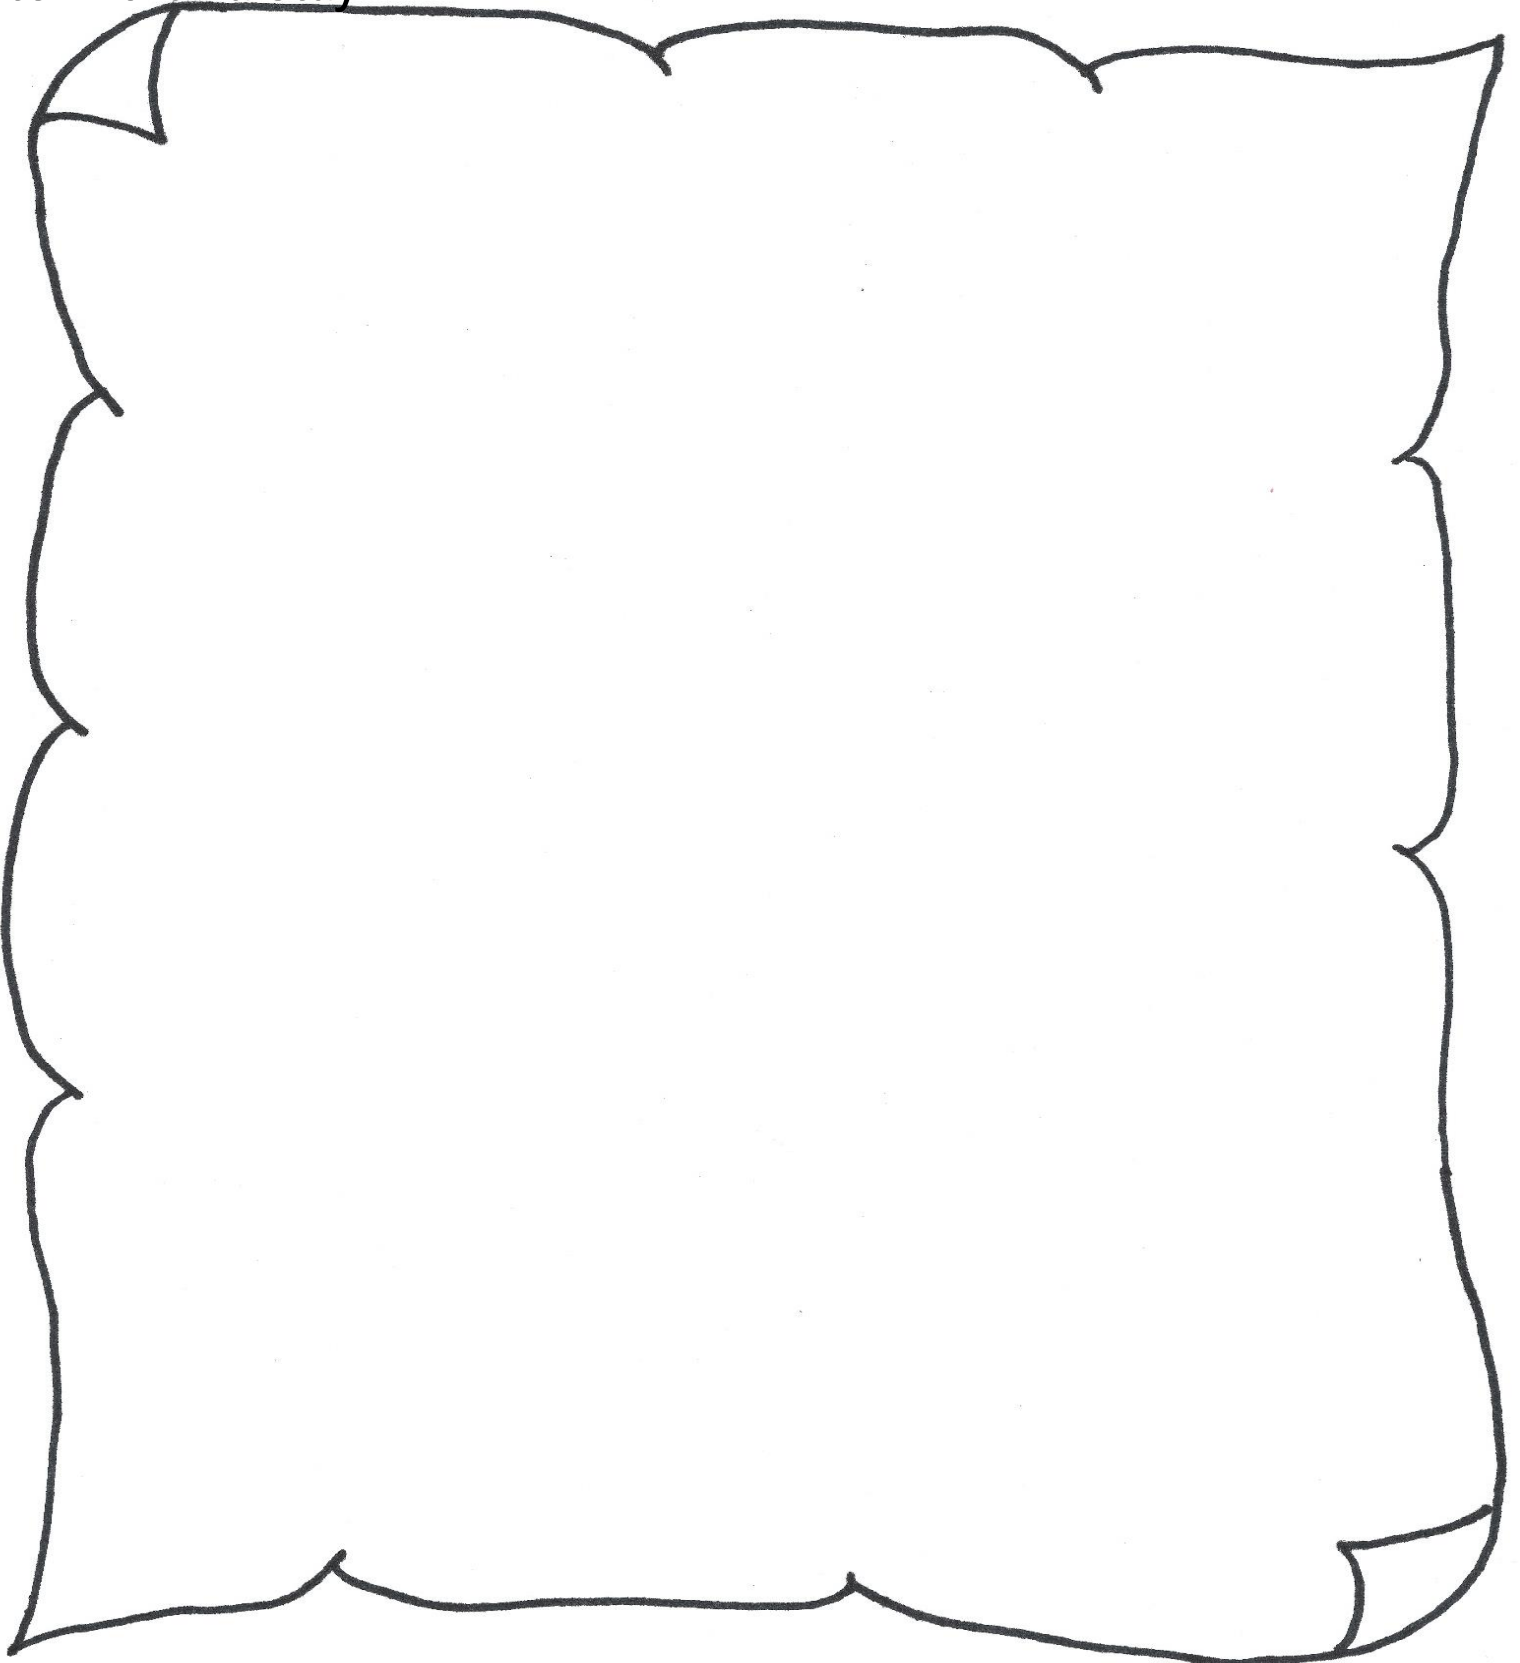

- Choose a species to build a hotel for
- Brainstorm what features their animal hotel would have
- Draw a blueprint
- Create a 3-D model out of recyclables

Students should make their hotels cater to the needs of their animals, and may need to do research and planning over several days, unless this is being done as a final project after studying a species. *However*, depending on the age and situation, students may be allowed to add a touch of make-believe by assuming their animal actually would check into a hotel and enjoy some anatomically-altered versions of human hotel perks 😊

Create an Animal Hotel

Name: _____

Create a poster to advertise your hotel (imagine your animal can read). Use lots of color and highlight the features that make your hotel worth a stay!

Create an Animal Hotel

Name: _____

_____/5 Named animal

_____/5 Named hotel

_____/15 Poster

_____/20 Listed at least 5 animal needs

_____/20 Listed at least 5 features to meet those
needs

_____/15 Floorplan

_____/20 3-D model matches
description/drawing

Animal Hotel Ideas

Bees	Stingrays
