

Representation of Numbers Honeycomb Game

- Copy pages onto cardstock.
- Cut word and expanded form numbers out and place strips in a cup, with the bees facing up.
- Give each player game chips of a different color.
- OR, print the blank honeycombs onto two different colors of cardstock and cut out to use as tokens.
- Children pull a strip number from the cup, locate its match in standard form, and place their color chip over a hexagon with that answer.
- If the number has been drawn in one form already, it may be covered on the board when the other form is drawn.
- Winner is first to cover 4 hexagons in a row, in any direction.
- If all strips are used without a winner, return all to the cup and continue.

Three million, four hundred eighty-two thousand, seven hundred ninety-one

Six million, eight hundred sixty-two thousand, three hundred seventy-four
