

# Pizza Math

Cut and laminate these pizza slices.

For students learning about mixed numbers and improper fractions, print about four copies of each.

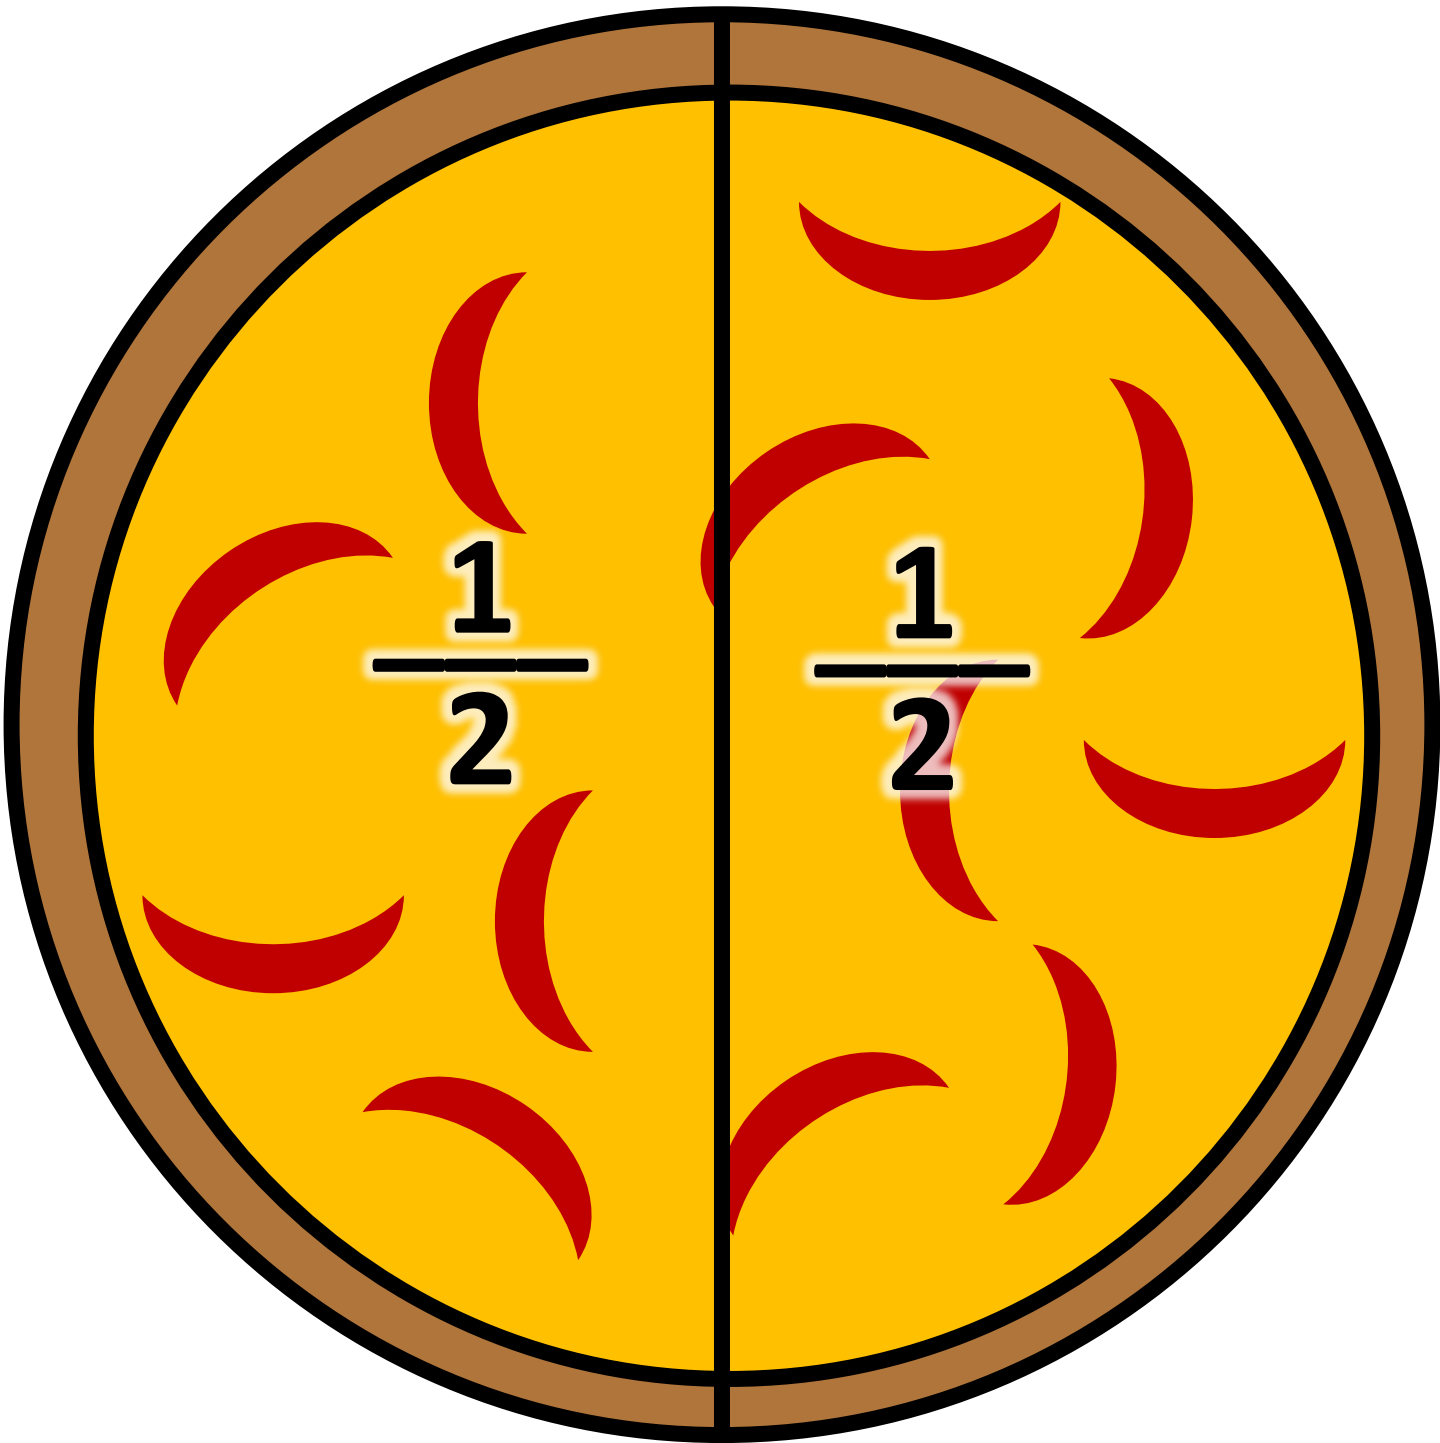

To teach the terms Numerator and Denominator, have students make a whole pizza and say,

“I have # slices of Deep-Dish Pizza. I’m going to eat # slice(s). Nom, nom, nom!” as they pretend to eat it. Remind them that Numerator starts with an N because it’s the part you Nom, Nom, Nom. Denominator starts with a D because it’s the Deep-Dish Pan you’re taking slices out of.
