

Place Value Flip Book

Use this as a tool to help children understand the value of each digit in large numbers.

Copy each place value onto a different color paper (blue for hundred thousands, pink for ten thousands, etc.)

OR...have children color each place value a different color.

Cut numbers out and stack them with the largest on the bottom.

Flip through them to see the “secret zeroes” hiding within large numbers.

Get the free, printable template at:
